python

Web Scraping

Network Analysis

Summary

With over 3 years of experience in analyzing complex datasets, generating analytical reports, and providing actionable insights to improve organizational performance, I am proficient in using tools like R, SQL, and Excel to analyze and visualize data and identify key business trends. My successful background in various work environments, both in technical and sales roles, has given me a broader perspective beyond pure data analysis, allowing me to provide more comprehensive insights, allowing me to collaborate effectively with sales and marketing teams to optimize data-driven strategies. I also have strong data storytelling skills, translating insights into clear reports for key decision-makers.

Experience

Data Analyst

Department of Sales and Marketing
Ashkan tejarat Aram

2023-2024

I focused on analyzing sales trends, customer behavior, and market data to optimize strategies. My responsibilities included cleaning data, creating insightful reports, identifying growth opportunities, and providing data-driven recommendations to improve performance.
